

SQA Assignment 4

Sarah Pham

Quick notes:

- Program slice must be executable
- Program dependency of a variable at a location
- In regards to the example given to us on Canvas -> Files -> Program.Slicing.SalesSlice.pdf, I included the lines with the int exam() and return so program is "executable"

1. "average"

Line numbers of program slice = [1,6,7,8,9,19,20,21,26,27,30,31]

2. "countEven"

Line numbers of program slice = [1,2,3,6,7,8,9,10,17,18,19,20,21,24]
